

# Crossover

Floor tiles: CROSSOVER anthracite

### **Sustainable planning and design: tiles for architectural design**

Villeroy & Boch ceramic tiles offer not only outstanding aesthetic and functional properties but also characteristics that are becoming increasingly important in the overall social context.

The consistent development of sustainable concepts and the provision of long-lasting solutions is the basic philosophy behind our designs, our work and our company.

### **Conserving natural resources**

We attach great importance to environmentally sound production and disposal and the extensive conservation of natural resources. We support environmentally sound principles and technologies through our membership and collaboration in European committees. However, the underlying quality also makes a significant contribution to environmental thinking and action, since environmental protection means not only a responsible approach to energy, emissions, raw materials and production methods but also durable and long-lasting products.

### **Creating values**

We have long been an international watchword for high quality standards. Our designs are not subject to the whims of fashion but are based on long-term and timelessly modern design and interior architecture guidelines. Our products therefore have long lifecycles and retain their value over an extended time. In this way, our company is a dependable partner for architects and designers with a progressive and sustainable attitude in sociocultural, technological and design terms: porcelain stoneware as the symbiosis of nature and technology.

# Crossover

CROSSOVER highlights the visual quality of volcanic rock and offers all the practical advantages of modern ceramics.

This wall and floor concept in grey and anthracite is versatile and functional and can be used for practically all applications.

The surfaces are matt, rough-polished or relief with various slip-resistance qualities up to class R11.

### **vilbostone porcelain stoneware**

vilbostone porcelain stoneware with full-body colouring presents a wealth of different surface designs featuring unusual colour and sheen effects. vilbostone porcelain stoneware is available both glazed and unglazed, with a matt, polished, rough-polished or relief surface finish and in various classes of slip resistance.

### **vilbostone<sup>plus</sup>**

Unglazed vilbostone porcelain stoneware with a matt or rough-polished surface finish have the vilbostone<sup>plus</sup> seal. During the manufacturing process, the structure of the tile surface is sealed in order to further increase the tiles' resistance to staining and dirt, as a result of which subsequent treatment with impregnating agents is no longer necessary.

Unglazed vilbostone porcelain stoneware is particularly suitable for heavily-used floors in public areas.

### **■ LIGHT TILE®**

### **Adding a touch of sparkle to your home!**

LIGHT TILE® integrates state-of-the-art LED technology into high-quality tiles for walls and floors. LIGHT TILE® is available in round or square form. The system is dust-proof, water-tight (IP67), impact-resistant, maintenance-free and is simply inserted into the tiles, without requiring any preliminary electronic installation work. You can find detailed information on LIGHT TILE® on the internet at [www.villeroy-boch.com/lighttile](http://www.villeroy-boch.com/lighttile).
